

Soybean Rust Identification Short Course Registration

Date: July 13, 2006

Focus: This Short Course has been designed with the agricultural specialist or consultant in mind; the intended audience includes soybean professionals from across the country. As such, we will concentrate on hands-on identification of the disease on the plant. We will also talk about scouting techniques and demonstrate methods we use to maximize our chances of finding the signs of this pathogen in the field. There will be a section concerning field trials at the research station as well.

Registration: FREE. Course participants will be provided with a 30X hand lens, disposable gloves, pants and boot covers, sanitizing stations, notepad and pen, a fungicide manual ("Using Foliar Fungicides to Manage Soybean Rust"), a Disease Severity Evaluation Scale publication, and a morning break and lunch. Dinner will be provided the evening preceding the course.

Please print this page, fill it out, and FAX it to Carrie Harmon at (352) 392-6532.	All fields are mandatory; we will not make this information available to any other agency or use it for any purpose that is not associated with this short course.
You may also copy this section and paste it into an email message and EMAIL it to <u>Carrie Harmon</u> .	

Name as you would like it to appear on your name tag: _____

Last Name	First Name	Mailing address	Work Phone	Emergency Phone*	Email Address

Occupation: _____

Primary crop responsibility: _____

*We request an emergency phone number in case of last-minute delays or problems due to hurricanes, etc. Last year's course took place immediately following the departure of Hurricane Dennis from the Florida panhandle. Although we do not foresee this happening again this year, we prefer to be prepared.
