Vegetable Crop Pest Management

A Guide for Commercial Applicators
Category 1B

Editor:
Rebecca L. Hines
Academic Specialist
Pesticide Education Program
Michigan State University
Acknowledgements

We would like to express our thanks for the advice and technical assistance of the following reviewers: Dr. Chris DiFonzo, MSU Pesticide Education Program; Dr. Ed Grafius, MSU Department of Entomology; Dr. Bernard Zandstra, MSU Department of Horticulture; Dr. Mary Hausbeck and Sheila Linderman, MSU Department of Plant Pathology; Fred Warner, MSU Diagnostic Services; Becca Thompson, MSU Integrated Pest Management Program, and Joe Strazalka, Michigan Department of Agriculture.

Special thanks go to:

Dr. George Bird, Department of Entomology, Michigan State University for providing the images of plant parasitic nematodes.

Steve Demming and Dr. Dale Mutch, Kellogg Biological Station, Michigan State University for graphics on page 4, 12, and 59.

Dr. Ed Grafius, Department of Entomology, Michigan State University and Dr. Bill Hutchison, Department of Entomology, University of Minnesota, for providing the images of vegetable insect pests.

Dr. Mary Hausbeck, Sheila Linderman and Dr. Willie Kirk, Department of Plant Pathology, Michigan State University, for providing the images of vegetable diseases.

Fred Warner, Diagnostic Services, Michigan State University, for writing Chapter 8, Nematode Management.
Vegetable Crop Pest Management

INTRODUCTION ............................................. v

CHAPTER 1: INTEGRATED PEST MANAGEMENT
Integrated Pest Management ................................ 1
Field Scouting, Monitoring ..................................... 1
Economic Thresholds ........................................ 2
Control Strategies ........................................... 2
Cultural Control ............................................. 2
Biological Control .......................................... 3
Chemical Control ............................................ 5
Review Questions ........................................... 6

CHAPTER 2: MINIMIZING PESTICIDE IMPACT . . . 9
State and Federal Laws ....................................... 9
Guidelines for Selecting and Using Pesticides .......... 9
Protecting Our Groundwater ............................... 10
Keeping Pesticides Out of Groundwater and Surface Water ............................................... 10
Protecting Non-target Organisms ......................... 11
Potential for Pesticide Resistance ......................... 12
The Development of Resistance ......................... 12
Resistance Management ................................... 13
Notifying Neighbors ........................................ 13
Review Questions ........................................... 14

CHAPTER 3: APPLICATION EQUIPMENT ......... 17
Methods of Application .................................... 17
Types of Sprayers ........................................... 17
Parts of a Sprayer .......................................... 18
Tanks ........................................................... 18
Agitators ....................................................... 18
Pumps .......................................................... 18
Strainers ......................................................... 19
Hoses ............................................................ 19
Pressure Regulators ........................................ 19
Pressure Gauge ............................................. 19
Nozzles ........................................................ 20
Operation and Maintenance of Sprayers ............... 20
Before Spraying ............................................. 20
During Spraying ............................................. 21
After Spraying ............................................... 21
Granular Applications ..................................... 21
Field Operations ........................................... 21
Global Positioning System and Geographical Information System ........................................ 21
Review Questions ........................................... 22

CHAPTER 4: CALIBRATION
Introduction .................................................. 25
Calibration of Sprayers ..................................... 25
Variables that Determine the Spray Rate ................ 25
Preparation Check of Nozzle Output .................... 26
Spray Pattern Uniformity ................................ 26
Broadcast Sprayer Calibration ............................ 27
Amount of Pesticide to Add to Tank .................... 28
Granular Applicator Calibration ......................... 28
Review Questions ........................................... 30

CHAPTER 5: INSECT MANAGEMENT ........... 33
Growth and Development .................................. 33
Considerations for Pest Management .................... 34
Insect Pests of Asparagus .................................. 34
Asparagus beetles ......................................... 34
Asparagus miner ............................................ 34
Cutworms ...................................................... 35
Insect Pests of Carrots ..................................... 35
Aster leafhopper ............................................ 35
Carrot weevil ............................................... 35
Insect Pests of Celery ....................................... 36
Aster leafhopper and carrot weevil ...................... 36
Green peach aphid and sunflower aphid ............... 36
Celery looper and cabbage looper ....................... 36
Tarnished plant bug ....................................... 37
Variegated cutworm ....................................... 37
Insect Pests of Cucurbits .................................. 38
Aphids ........................................................ 38
Cucumber beetles ......................................... 38
Squash bug ................................................... 38
Insect Pests of Cole Crops ................................ 39
Imported cabbageworm .................................... 39
Cabbage looper ............................................. 40
Diamondback moth ....................................... 40
Cabbage maggots ......................................... 41
Insect Pests of Corn (Sweet) .............................. 41
Corn flea beetle ............................................ 41
European corn borer ...................................... 41
Corn earworm ............................................... 42
Fall armyworm ............................................. 43
Insect Pests of Onions ..................................... 43
Onion maggot ............................................... 43
Onion thrips ................................................ 44
Insect Pests of Potatoes .................................. 44
Colorado potato beetle .................................... 44
Potato leafhopper .......................................... 45
Green peach aphid and potato aphid ................... 45
Insect Pests of Snap Beans ................................. 45
Potato leafhoppers ........................................ 45
Tarnished plant bug ....................................... 45
European corn borer ...................................... 46
Insect Pests of Tomatos .................................... 46
Colorado potato beetle .................................... 46
Tomato hornworm ......................................... 46
Tomato fruitworm ......................................... 47
### Contents

**CHAPTER 6: WEED MANAGEMENT** 51
- Development Stages 51
- Life Cycles of Weeds 51
- Common Weeds in Michigan 52
- Grass and Grasslike Weeds 52
- Broadleaf Weeds 52
- Weed Control 53
- Cultural Control 53
- Mechanical Control 53
- Chemical Control 53
- Types of Herbicides 53
  - Preplant Herbicide Soil Applications and Incorporation 53
  - Preemergence Herbicide Applications 53
  - Postemergence Herbicide Applications 54
- Herbicide Carryover 54
- Herbicide Combinations 54
- Herbicide Additives (Adjuvants) 55
- Herbicide Compatibility Problems 55
- Review Questions 55

**CHAPTER 7: DISEASE MANAGEMENT** 57
- Introduction 57
- Fungi 57
- Bacteria 58
- Viruses 58
- Disease Triangle 58
- Disease Cycle 58
- Disease Management 60
  - Cultural Control 60
  - Biological Control 60
  - Chemical Control 60
- Diseases of Asparagus 60
  - Rust 60
  - Purple spot 61
  - Fusarium wilt and crown rot 61
- Diseases of Carrots 61
  - Aster yellows 61
  - Alternaria leaf spot 62
  - Cercospora leaf spot 62
  - Damping off 63
- Diseases of Celery 63
  - Aster yellows 63
  - Septoria leaf blight 63
  - Bacterial leaf blight 63
  - Fusarium yellows 64
- Diseases of Cole Crops 64
  - Black leg 64
  - Black rot 64
  - Alternaria leaf spot 65
  - Clubroot 65
  - Downy mildew 65
  
- Diseases of Corn 66
  - Common rust 66
  - Corn smut 66
  - Stewart’s wilt 67
- Diseases of Cucurbits 67
  - Alternaria leaf spot 67
  - Mosaic viruses 68
  - Powdery mildew 68
  - Phytophthora root, crown, and fruit rot 69
- Diseases of Onions 69
  - Purple blotch 69
  - Downy mildew 70
  - Smut 70
  - Botrytis leaf blight 71
- Diseases of Potatoes 71
  - Early blight 71
  - Late blight 72
  - Fusarium dry rot 73
  - Common scab 73
  - Black scurf/stem canker 74
- Diseases of Snap Beans 74
  - Fusarium root rot 74
  - White mold 74
  - Halo blight 75
- Diseases of Tomatoes 75
  - Early blight 75
  - Septoria leaf spot 76
  - Anthracnose 76
  - Bacterial spot 77
- Review Questions 78

**CHAPTER 8: NEMATODE MANAGEMENT** 81
- Introduction 81
- Plant-parasitic Nematodes 82
- Nematodes of Importance in Vegetable Production 82
  - Northern Root-knot Nematode 82
  - Lesion Nematode 83
  - Cyst Nematode 83
  - Stem and Bulb Nematode 85
  - Common Needle Nematode 85
  - Pin Nematode 86
- Sampling Nematode Populations 86
- Management of Plant-parasitic Nematodes 86
- Review Questions 87

**APPENDIX A: Answers to Review Questions** 89

**APPENDIX B: Conversion Tables** 91

**APPENDIX C: Glossary** 92

**APPENDIX D: Selected Bibliography** 99

**Pesticide Emergency Information** 101

**APPENDIX E: Crop-destroying Pests** 103
How to Use This Manual

This manual contains the information needed to become a certified commercial applicator in Category 1B, Vegetables. This manual is intended for use in combination with the Pesticide Applicator Core Training Manual (Extension bulletin E-2195), available through the Michigan State University Bulletin Office. However, this manual would also be useful to anyone interested in learning more about vegetable pest management.

Category 1B, Vegetables, covers the management and control of common pests in asparagus, carrots, celery, cucurbits, cole crops, onions, potatoes, snap beans, sweet corn and tomatoes. The manual presents basic scientific information on pest life cycles and emphasizes protecting non-target organisms and preventing the development of resistance in pests.

The Category 1B certification exam is based on information found in this booklet. Each chapter begins with a set of learning objectives that help you focus on what you should understand from each chapter. The table of contents helps you identify important topics and understand how they relate to one another through the organization of headings and subheadings. As you prepare for the exam, read each chapter and answer the review questions. These questions are not on the certification exam, but are provided to help you prepare for the exam. Questions on the exam will pertain directly to the learning objectives.

The appendices and glossary, including an answer key (Appendix A), at the end of this manual provide supplemental information that will help you understand the topics covered in the chapters. Terms throughout the manual text that are bold or italicized can also be found in the glossary.

This certification manual benefits the applicator and the general public. By learning how to handle pesticides correctly, applicators can protect themselves, others, and the environment from pesticide misuse. For more specific information on how to become a certified applicator in Michigan, refer to the beginning of the core manual (E-2195) or the Michigan Department of Agriculture’s Web site, <http://www.mda.state.mi.us>, or call the MDA at 1-800-292-3939.
